

# MOBILE DECONTAMINATION UNIT

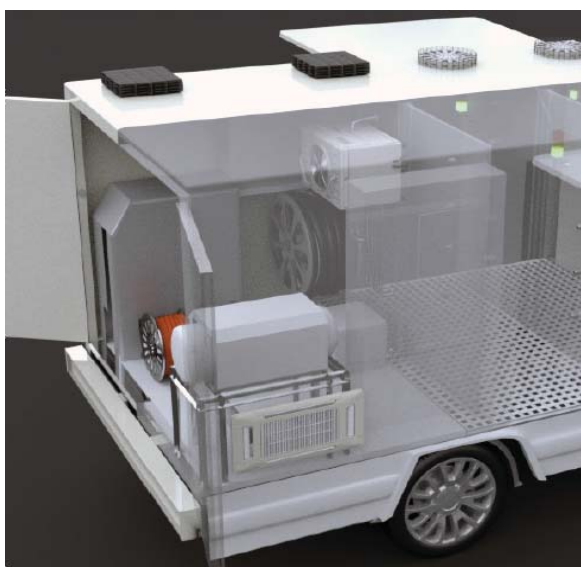

*EASY TO ASSEMBLY*

UTILIS SAS, the class-leading developer of decontamination solutions, introduces the new mobile decontamination unit.

*1 - 2 PERSON DEPLOYMENT*

## TECHNICAL DESCRIPTION

- ▶ The decontamination unit comprises of a re-mountable cell installed on a chassis-cab platform, divided into two functional compartments :
- ▶ A technical compartment, located at the rear of the cell, contains all necessary equipment for utilities provision; including power generator, water supply, heating and control panel, etc. All of the equipment except the generator is pre-integrated within the cell, remaining permanently in place throughout operation. The power generator is mounted externally and connected via a 10m power distribution cable.
- ▶ A shower compartment is located at the front of the cell, with an extending cover forming a reception area, undressing compartment, decontamination shower compartment, rinse shower, dressing compartment and a receiving area.

## TWO SEPERATE UNITS FOR VALID VICTIMS AND DISABLED VICTIMS

### UNIT A

- ▶ This unit permits decontamination for able-bodied victims, comprised of two distinct decontamination lines.

### UNIT B

- ▶ This unit permits decontamination of stretcher-borne users, via a roller supports structure allowing users to proceed through the system in sequence. The cell is composed of a single decontamination line due to the workspace necessary around immobile users during decontamination. Due to its design, the cell can also be used to process able-bodied users.
