

TM TENTS

SET-UP IN LESS THAN 3 MINUTES

- 30°C

+ 70°C

COMMERCIAL DESCRIPTION

TM tents benefit of a light weight, an advanced design, a quick assembly and an extreme versatility. The tents allow interconnections on the front side or on the lateral sides and allow the establishment of different configurations.

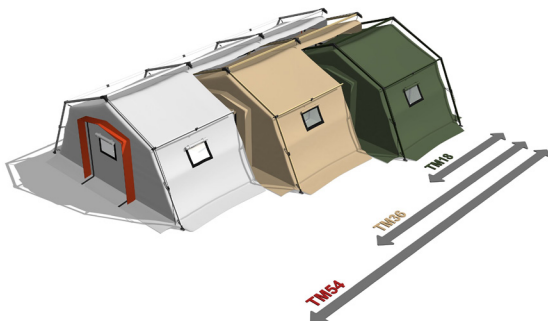

TECHNICAL DESCRIPTION

Standard configuration :

- Colours : white, sand or NATO green
- One 1.8m-wide door on each gable with a zip system
- Windows with transparent welded layer + external or internal shutter (85 x 62 cm) + mosquito net with shutter (70 x 45 cm)
- Ground sheet welded on sides or attached by velcro + straps on gable
- Specific design of the ground sheet to exclude water intrusion
- Possibility to suspend an inner liner
- Ceiling net under the roof
- Connection flaps all around each of the doors for interconnection of tents in H, I, T or X configurations
- 2 ducts openings for ducts or cables
- 1 tightness flap for tent connection
- Staking kit

Transport and storage :

- Maximum temperature : + 70°C
- Packed in PVC bags with 8 handles

TM TENTS

Equip more than 20 armies in the world

HIGH QUALITY MANUFACTURING

The TM tents are made of resistant and quality materials.

- ▶ Bars and mechanical part made from anodized or epoxy coated aluminium alloy.
Axles and foot plates made from stainless steel.
Eyelets, toggles, hooks and screws made from hot-dip galvanized steel that provides high corrosion resistance (salt spray testing for 168 hours).
- ▶ Main canvas manufactured from 500 g/m² polyester material coated with PVC from both sides.
All shelters use high frequency welding techniques.
